

Your NEW front door is a FIRE DOOR!

Fire doors and their frames save lives by delaying the spread of fire through a building, keeping you and your neighbours safe until the fire brigade arrives – but they can only protect you if you protect them:

ALWAYS keep your fire door shut.
NEVER prop it open – not even for a minute.

DO NOT tamper with, or disconnect the automatic door closer.

DO NOT fix anything to the fire door or to its frame. Screws, nails or even self-adhesive items will SEVERELY DAMAGE their fire resistance.

NEVER hang anything on the fire door or its frame and DO NOT paint or decorate them.

ALWAYS report any issues with, or damage to your fire door or its frame IMMEDIATELY by calling General Repairs on 024 7637 6344.
